mosphere undergo an electric per-turbation at our equinoxes. Physi-cal phenomena indicate this; the The last paragraph would seem to tides then run higher, the barometer indicate that they are so green as to ranges lower, and electric teusion begreater than at any other season of the year. The magnetic perturbafurious storms, and a 'swing' of the periodical winds. All these are efthat our planet and its atmosbere are then in an abnormal electric state. He says: I, therefore,

there back than 1873, but so far show a decided influence upon both the frequency of phenomena and their energy.

THE EQUINOXES OF 1875.

This year we have the following planetary equinoxes: Mercury, 8; Venus 3; Earth, 2; and Mars 1; or 14 in all. Now, from the 5th of March to the 30th of April we had five cut of the fourteen, namely: Venus, March 5; Mercury, 12; Earth, 21. Mercury, April 24; Mars, April 24; Mars, April 250; that is, in filty-five days we have had five equinoxes, or on an average one overy eleven days.

From the 1st of May to the 22d of September next, 145 days, there will show as that moment the guide rope snapped off a branch of a tree, with a report like a cannon, and gave the balloon a violent shaking, Mr. from a Broken Heart.

His Daughter and her Death from a Broken Heart.

The following account of the celebrated Sionx chief, Spotted Tail, is from advance sheets of Gen. Brisbeauch to the 30th of April we had five cut of the fourteen, namely: presence; for when McKeever remarked to me, 'This man's conduct presence; for when McKeever remarked to me, 'This man's conduct presence; for when McKeever remarked to me, 'This man's conduct presence; for when McKeever remarked to me, 'This man's conduct presence; for when McKeever remarked to me, 'This man's conduct presence; for when McKeever remarked to me, 'This man's conduct presence; for when McKeever remarked to me, 'This man's conduct presence; for when McKeever remarked to me, 'This man's conduct presence; for when McKeever remarked to me, 'This man's conduct presence; for when McKeever remarked to me, 'This man's conduct presence; for when McKeever remarked to me, 'This man's conduct presence; for when McKeever remarked to me, 'This man's conduct presence; for when McKeever remarked to me, 'This man's conduct presence; for when McKeever remarked to me, 'This man's conduct presence; for when McKeever remarked to me, 'This man's conduct presence; for when McKeever remarked to me, 'This man's conduct presence; for when McKeever remarked to me,

and this year, the frogs and grass-hoppers.

The St. Louis Republican of the 19th says:

Prof. John H. Tice, of St. Louis, is a true genius. His genius is in the science of meteorology, and there is not another man that knows half as much as he about the laws of storms. The recent romarkable atmospheric purturbatious were foretold by him more than two months ago, with as much accuracy as they could be writ.

On the 14th Prof. Tice, to give an integrating the community of the 14th Prof. Tice, to give an integration at mannar with our poportunity to test his theory, made him to come down; McKeev

Kansas Cirv. June 18.—A fearful rain storm passed over Wyandette, Kansas, being unable to sustain itself, will his affertoon about 5 o'clock. Lightning struck a Mrs. Bradish while nursing return the grounds and buildings to the babe instantly, and the mother is now in a dying condition.

rho looks back to 'the good old days' when everything was bigger and hetter than now, rise up and tell al about that storm which happened in

fully covered by insurance. Anna Dickinson has been sued by young man named Hill, of pleasing

manners and religious training, for \$280 das him as her lecture agent. Hill got judgment against her, but we wager a nickle she will take an appeal, for when the gentle Anna gets up on her auricular appendage, nothing shorter than the U.S. Sureme court can reach her and bring her down again to the level of a

tenant governor of Michigan bas lately brought himself into notoriecane. It was none of your common and speeches, but one of those good old-fashioned 'laying on of hands' which we have read about. It seems

The following dispatch, from Willkesbarre, Pa., where the miners are on a strike, will show the brutaltwo kegs of powder and a lighted fuse were thrown through the widow of James Curry's house in Kingston

geance was thus attempted on him. This morning about twenty men went to the Waterman and three months, ago, they had a big currence of the Jovial year, or the racy scandal in Leavenworth? Judge

was charged with having written as being a young widow of voluptnous beauty and rare personal, charms-which were a little too gushing for anything. They rivaled in plainness and amorous freedom of speech, even the works of Henry Fielding. The lady's father was opposed to his daughter having anything to do with the Judge. But t seems the fair widow had a mind of her own, and would see the judge, who was her legal adviser. One day Capt. E. Henlsly, the widows father went for the judge with a shot gun.

gentlemen for \$50,000 demages for -lander. Funerals are in order. The Republican State Convention of California met on the 10 inst. and nominated T.G. Phepis for Governor and James M. Caves for Lieutenant governor. Their platform says: We have undiminished confidence in the wisdom, patriotism and integrity of the present chief magistrate of the United States. * * That the letthe chairman of the Pennsylvania same.

slanders of those who charge him with intriguing for re-electio that we accept it as an explicit and final will produce like results. settlement of the third term seitstion, created by our enemies so sly to arouse jealousies and dissension The last paragraph would seem to render it dangerous for them to re-

The Rolivar Press says that in the vicinity of the Mounds, three miles south of Bolivar, dogs have killed at least two hundred sheep within the past month. A yearling steer has also been killed by dogs. As a result, a war of extermination is being waged against the dogs in that locality.
